SAFETY DATA SHEET

11561 Westminster Ave
Garden Grove, CA 92843

Office: 714-554-8880
Fax: 714-554-8887

US Hazmat Emergency: 800-373-7542
Intl Hazmat Emergency: +1-484-951-2432

SECTION 1. IDENTIFICATION

Brand: Cre8tion

Trade Name: Massage Oil Candles LAVENDER & VANILLA - Tealight 0.5oz & 6oz

Product Number: 24032 & 24052

Address: 11561 Westminster Ave, Garden Grove, CA 92843

SECTION 2. HAZARDS IDENTIFICATION

Hazard Categories: Not classified as hazardous goods.
Route of Exposure: May be harmful upon skin contact.
Environmental Impact: Slightly hazardous; avoid contaminating water sources.
Explosion Hazard: This product is non-combustible and poses no explosion risk.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Main components	INCI Name	Content(%)	CAS NO
Cocoa Butter	Theobroma Cacao Seed Butter	75-80	8002-31-1
Jojoba Oil	Simmondsia Chinensis Seed Oil	5-8	90045-98-0
Wheat Germ Oil	Triticum Vulgare Germ Oil	3-5	8006-95-9
Apricot Kernel Oil	Kyounin Yu (Prunus Armeniaca)	3-5	72869-69-3
Lavender Oil	Lavandula Angustifolia Oil	2-4	8000-28-0
Vanilla Oleoresin	Vanilla Planifolia Fruit Oil	1-2	8024-06-4

SECTION 4. FIRST AID MEASURES

Skin Contact:
Remove contaminated clothing immediately. Wash affected skin thoroughly with soap and water for at least 15 minutes. Seek medical attention if irritation persists.

Eye Contact:
Rinse eyes cautiously with clean water for at least 15 minutes, lifting upper and lower eyelids occasionally. Remove contact lenses if present and easy to do. Seek medical attention immediately.

Inhalation:
If inhaled, move the person to fresh air. If the person is not breathing, administer artificial respiration. If breathing is difficult, provide oxygen. Seek medical attention immediately.

Ingestion:
Do not induce vomiting. Rinse mouth with water if the person is conscious. Never give anything by mouth to an unconscious person. Keep the person calm and seek medical attention immediately. Milk or water may be given to dilute if advised by medical personnel.

SECTION 5. FIRE-FIGHTING MEASURES

Explosion Hazard: Not classified as explosive or flammable.

Hazardous Combustion Products: Not applicable; product is not classified as a combustion hazard.

Suitable Extinguishing Media: Use water spray, dry chemical powder, foam, or sand to extinguish fire.

Firefighting Instructions: Wear self-contained breathing apparatus (SCBA) and full protective gear. Avoid inhalation of combustion gases. Cool surrounding containers with water spray to prevent pressure buildup and possible explosion.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Emergency Disposal:
In the event of a minor spill, ensure proper ventilation. Absorb spilled material with inert materials such as sand, and dispose of the collected waste in accordance with local environmental regulations at a designated sanitation landfill. Clean the contaminated area with soap and water. The resulting wastewater should be diluted before discharge into the sewage system.

For large spills, notify local authorities immediately. Ensure personal safety first. Stop the source of the leak if it is safe to do so. Prevent the material from entering drains, sewers, or confined spaces. Evacuate all non-essential personnel from the affected area. Use barriers (cofferdams) to contain the spill and then proceed with collection, transfer, and proper disposal or recycling as per local regulations.

Disposal Method:
Send waste and contaminated materials to an approved landfill designated by environmental sanitation authorities.

SECTION 7. HANDLING AND STORAGE

Handling: Ensure adequate ventilation in the working environment. Operators must be properly trained and strictly follow all safety procedures. It is recommended to wear protective masks and avoid smoking in the workplace. Use appropriate ventilation systems. Ensure the area is equipped with suitable fire extinguishing equipment and spill containment materials.

Storage: Store in a cool, well-ventilated warehouse at temperatures below 22°C. Keep away from heat, flames, and direct sunlight.

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls:
Ensure adequate local or general ventilation to maintain exposure levels below recommended limits.

Respiratory Protection:
Wear appropriate masks or respirators if ventilation is insufficient or if exposure limits may be exceeded.

Eye Protection:
Wear chemical safety goggles or flat protective glasses to prevent eye contact.

Body Protection:
Wear protective clothing, such as cotton overalls, to prevent skin exposure.

Hand Protection:
It is recommended to wear polyethylene (PE) film gloves or chemically resistant gloves.

Other Precautions:
Do not smoke, eat, or drink in the work area. Avoid consuming alcohol before work. Shower and change into clean clothes after handling the product. Pre-employment and routine health checks are advised for personnel working with chemical substances.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

- Appearance: Waxy solid / Mixed plant oils.
- pH Value: 6–7
- Melting Point (°C): 30 – 45 (approximate for botanical butters).
- Relative Density (Water = 1): 0.9 – 1.1
- Boiling Point (°C): Not applicable
- Relative Vapor Density (Air = 1): Not available
- Flash Point (°C): Not applicable
- Solubility: Immiscible with water.

SECTION 10. STABILITY AND REACTIVITY

- **Stability:** Stable under normal conditions.
- **Incompatible Materials:** Avoid contact with strong acids, strong alkalis, and oxidizing agents.
- **Conditions to Avoid:** High temperatures, direct sunlight.
- **Hazardous Polymerization:** May occur upon exposure to UV light, accompanied by heat generation.
- **Hazardous Decomposition Products:** May produce carbon oxides, during decomposition.

SECTION 11. TOXICOLOGICAL INFORMATION

Toxicity : Low in toxicity, with an estimated LD50 greater than 3000 mg/kg.

Irritation : Prolonged or repeated skin contact may cause irritation.

Carcinogenicity: No confirmed evidence of carcinogenicity under normal usage conditions.

SECTION 12. ECOLOGICAL INFORMATION

Environmental Prevention: This product should not be released into the environment without proper treatment. Prevent contamination of soil, surface water, and groundwater.

SECTION 13. DISPOSAL CONSIDERATIONS

Waste Classification: Classified as dye/coating-related or cosmetic waste.

Disposal Method: Dispose of at designated landfill sites approved by the local sanitation department.

SECTION 14. TRANSPORT INFORMATION

Classification: This product is not classified as a dangerous substance under international transport regulations.

Packaging Methods: Can be packed in cartons, PP plastic bottles, or glass bottles.

Notes: Handle with care. In hot weather, transport during cooler times to avoid melting.

SECTION 15. REGULATORY INFORMATION

OSHA: This product is classified as hazardous and requires appropriate labeling.

TSCA: All components of this product are listed or exempt from listing on the TSCA Inventory.

California Proposition 65: This product does not contain any chemicals known to cause cancer, birth defects, or reproductive harm.

Creation Date: Jan 8, 2025.

Last Revision Date: May 10, 2025.

SECTION 16. OTHER INFORMATION

The information provided in this MSDS is believed to be accurate and represents the best information currently available. However, no warranty, expressed or implied, is made regarding the accuracy or completeness of this data. It is the user's responsibility to determine the suitability of this information for their particular purposes and to comply with all applicable laws and regulations.
